

IN THE CLAIMS:

The text of all pending claims, (including withdrawn claims) is set forth below. Cancelled and not entered claims are indicated with claim number and status only. The claims as listed below show added text with underlining and deleted text with ~~striketrough~~. The status of each claim is indicated with one of (original), (currently amended), (cancelled), (withdrawn), (new), (previously presented), or (not entered).

Please CANCEL claims 13-15 in accordance with the following:

1. (ORIGINAL) A system for mediating between at least one user and at least one manufacturer via a network, said system comprising:

a storage part in which purchase information related to products possessed by said at least one user is stored; and

an insurance request part capable of requesting insurance on said products according to said purchase in formation stored in said storage part.

2. (ORIGINAL) The system as claimed in claim 1,
wherein said insurance request part sends information including at least a number of years used, year and month of purchase and maintenance of the product.

3. (ORIGINAL) The system as claimed in claim 1,
wherein said insurance request part sends information for collectively insuring a plurality of products possessed by the user with a single insurance contract.

4. (ORIGINAL) The system as claimed in claim 1,
wherein said insurance request part further comprises:
a quote estimate part requesting a quote estimate from a plurality of insurers; and
a sign-up part sending a sign-up instruction to the insurer selected by the user to make a contract for insurance.

5. (ORIGINAL) A system for mediating between at least one user and at least one manufacturer via a network, said system comprising:
a first storage part in which purchase information related to products possessed by said

at least one user is stored;

a second storage part in which at least an identifier of a product and guarantee information related to said product are stored for each product available from said at least one manufacturer; and

an insurance request part which requests insurance on said products according to said purchase information stored in said storage part.

6. (ORIGINAL) The system as claimed in claim 5,
wherein said insurance request part sends information including at least a number of years used, year and month of purchase and maintenance of the product.

7. (ORIGINAL) The system as claimed in claim 5,
wherein said insurance request part sends information for collectively insuring a plurality of products possessed by the user with a single insurance contract.

8. (ORIGINAL) The system as claimed in claim 5,
wherein said insurance request part further comprises:
a quote estimate part requesting a quote estimate from a plurality of insurers; and
a sign-up part sending a sign-up instruction to the insurer selected by the user to make a contract for insurance.

9. (ORIGINAL) A system for managing information transfer over a network between at least one user, at least one manufacturer and at least one insurer, said system comprising:

a storage part in which purchase information related to products possessed by said at least one user is stored; and

an insurance request part capable of sending requests to said at least one insurer for making an insurance contract on said products according to said purchase information stored in said storage part.

10. (ORIGINAL) A method of mediating between at least one user and at least one manufacturer over a network, said method comprising the steps of:

a) receiving purchase information related to products possessed by said at least one

user;

- b) storing said purchase information in a storage part; and
- c) requesting insurance on said products according to said purchase information stored in said storage part.

11. (ORIGINAL) A method of managing information transfer over a network between at least one user, at least one manufacturer and at least one insurer, said method comprising the steps of:

- a) receiving purchase information related to products possessed by said at least one user;
- b) storing said purchase information in a storage part; and
- c) sending requests to said at least one insurer for making an insurance contract on said products according to said purchase information stored in said storage part.

12. (ORIGINAL) A computer readable medium storing a program for executing a method of operating a product information system mediating between at least one user and at least one manufacturer over a network, said method comprising the steps of:

- a) receiving purchase information related to products possessed by said at least one user;
- b) storing said purchase information in a storage part; and
- c) requesting insurance on said products according to said purchase information stored in said storage part.
